Eye Wonder Series correlated to Career Clusters

Produced by ITV in conjunction with ETV, this Telly Award-winning series explores relevant science topics, integrating technology and focusing on varying career clusters. The series excites students with interesting facts and just plain fun! It looks at the world around us through the eyes of the cameraman. Through his zany, off-the-wall, wacky wit, students learn about fascinating wonders -- from how doughnuts are made to why tennis balls are designed the way they are, and much more. Each lesson group is split into feature segments totally 26 minutes: 46 seconds.

Lesson numbers and title segments are designated by career clusters.
